MAJOR PROJECTS

- **Commu Pro** *Project done during my internship at Ascent Futuretech LLP [2018]*
A progressive web app using Angular as the framework, Commu Pro was a general community application ready to be pitched to potential clients. It included use of Typescript, SQL, HTML and CSS
- **Pc Controller** [2018]
A link between the pc and android device that would allow the control of the peripherals of the PC Mouse and Keyboard using the android device, we could also receive files from the PC using socket programming.
- **Chip In** [2018]
It is an application which shall be an alternative to mobile wallet allowing to keep precise track of all the expenditure being done in a group. Also allowing maintenance of balance between 2 users.
- **Saaboo Sidik Polytechnic Hackathon: Project: Speak Up** [2017]
An android social network application especially for the social issues involved in the city. It included a database where the stories were uploaded consisting of image location title and description, I worked connecting the database to the various features of the application.

TECHNICAL SKILLS

- **Languages** (Proficient: C++, Prior Experience: PHP, MySQL, CSS, HTML, Java)
- **Platforms** (Linux and Windows)
